

Cooling Pictures from GAMI at KADH

October 2, 2004

The only pictures I took compare the ducting to the lower cylinder head fins between the fins on Pat's Lancair IV and the Cirrus SR22. The pictures of the ducting pieces George made for the Lancair IV he modified were in his slides and have been posted on LML by others.

I also added some other pictures that may be of interest.

Lancair forward cylinder pilot side. This should cover fins and have sides.

Cirrus forward cylinder pilot side

Lancair inter-cylinder duct very similar to Cirrus below.

Cirrus inter-cylinder duct

Lancair rear (pilot side) with no duct

Cirrus rear (pilot side) duct.

Other pictures from Ada:

Pat's Lancair IV at the GAMI/Tornado Alley Turbo Hanger.

George Braly

Gami Engine test building.

Engine test operator consoles.

Prism replaces mags.
